## MODEL NUMBER: AD106-LS

**Product Type:** Gross weigh belt fed bagging scale for weighing and filling a variety of product, from hard to flow to free-flowing and everything in between.

### Features:

- 14" x 18" feeder inlet. The largest in the industry that allows us to handle the worse of all products.
- Feeder belt to take the product out of supply bin and feed it directly into the suspended bag.
- Cut off gate between the feeder belt and the bag spout.
- Air operated bag clamps
- Open bottom below the feeder belt to prevent product build up.

### Capacity:

- Up to 12 Bags per minute

### Description:

This is one of our most versatile baggers ever. It's proven to be rugged and sufficient for most applications. Because of its design it can handle a wide spectrum of products and weight ranges.

### Controls:

- See the "Controls" page on our website to learn how our machines run and weigh product and the features which make our controls unique and our machines second to none in the industry.

### The Johnson & Sons advantage:

- Every piece of Johnson equipment is built to your design needs
- The most accurate bagging scales on the market
- The industry standard in customer service
- Quick and easy maintenance and repair
